Abstract (en)

[origin: WO2010076441A1] The invention relates to an assembly that includes a front frame (1) and a cradle for an automobile, the front frame (1) including two front rails (3) and the cradle (2) including, on either side and on the front portion thereof, a clevis (5) for receiving a hinge for a suspension arm, the rear end of each front rail (3) being connected to one of said two clevises (5) of the cradle (2) by a centring member (6), characterised in that the connection between each front rail (3) and the corresponding clevis (5) is reinforced by a reinforcing part (10) partially covering the centring member (6).
