Abstract (en)

[origin: WO2010055158A1] The invention relates to a method for producing fatty acid esters and/or fatty acid ester mixtures of monovalent alcohols containing between 1 and 5 carbon atoms, by the transesterification of fatty acid glycerides with monovalent alcohols in the presence of a basic catalyst, using methanesulfonic acid. The invention also relates to the use of methanesulfonic acid for producing said fatty acid esters.
