Abstract (en)
[origin: US2010199874A1] An irritation body (1) is proposed that has a container (5) and a first effect charge as well as an ignition mechanism (3) and an ignition cap (4), which now has in the free area on the floor (8) of the irritation body (1) an additional body (10) provided with a further or second effect charge (11). The housing (12) of the additional body (10) is preferably made of plastic and contains, for example, metal dust as the second effect charge (11).
