Abstract (en)  
[origin: WO2010066952A1] The present invention relates to a method for checking the reading of at least one mobile radiofrequency transponder (2, 3, 5) moving relative to an antenna (7, 17) of a reader (6, 16) of said transponder, for which: at least one guaranteed reading zone is defined around the antenna; at least one checking transponder (4, 14) is attached in the periphery of the guaranteed reading area in order to have the reading thereof periodically checked by the reader in addition to reading the mobile transponder. Examples of equipment for implementing said method are also provided.
