Abstract (en)
Floor squeegee comprising a floor squeegee body (22) and a rubber blade holder (1,4,5,6,16) which can be coupled and uncoupled manually by displacing a coupling member (16) which is provided on the rubber blade holder (1,4,5,6,16) between a coupling position and an uncoupling position, in which the coupling member (16) is displaceable between said positions along the longitudinal direction (P) of the rubber blade holder (1,4,5,6,16). Such a coupling is particularly user-friendly and reliable, and makes it possible to design the floor squeegee body (22) as a simple and easily cleanable element.
