Abstract (en)
[origin: EP2360327A2] The element has a massive plate (1) made of a wood material i.e. plank plywood, and connected with support elements i.e. belts (3), by rods (2). The belts support an outer covering (5) and trim plates (6). An edge (8) of the rod is directly engaged at grooves (7, 9) of the massive plate. The grooves and/or the rod comprise side flanks profiled as saw-shaped or structured in cross-section in an engagement region. The trim plates are made of different materials. The rods are distributed over height of the massive plate.
