Abstract (en)

[origin: EP2360340A2] The system has a wing profile (10) forming a profile frame of a door wing (3), and connected with a ground beam element (40) via an adapter profile (20). Height of the adapter profile corresponds to height (H0) of an air gap between the ground beam element and the door wing. The wing profile includes a rabbet projection at a side that faces an inner side of a building. The rabbet projection is arranged laterally adjacent to the adapter profile, and extends below a lower side of the wing profile. The adapter profile is mountable at the lower side of the wing profile. The ground beam element includes a partial profile made of metal and another partial profile made of plastic material.
