Abstract (en)

[origin: EP2360344A2] The connector (100) has connection pieces (110a, 110b) engaged in inner- and/or outer profile chambers of a side profile of window- and door frames. An insulating profile (120) is formed between the connection pieces. The connection pieces are releasably connected with each other by the insulating profile, and the profile has pins (124) accommodatable in eyelets (114) of the connection pieces. The insulating profile is made of a flexible plastic material, and the pins are formed as hollow profile.
