Abstract (en)  
[origin: EP2361842A1] The bag (1) has a handle strip (12) attached to a filling chamber (16) at a side, where the filling chamber is enclosed by two layers of a plastic foil with thickness of less than 40 micrometers. The plastic foil is merged in the handle strip along a filling chamber periphery (15) and extends up to a separating seam (8) as an outer edge of the handle strip. The outer edge is sectionally introduced into elongate sections (21, 22) at the filling chamber periphery, where the elongate sections contain no handle opening (13).
