Abstract (en)
[origin: EP2362048A2] The appliance has a hinge device provided for a door (2), and a strut (6) rotatably supported in a hinge cabinet. An adjusting element (52) adjusts an initial stress of a counterweight spring (42) and is freely accessible over a receiving opening in a flange (10), where the receiving opening is provided for the hinge device. The hinge cabinet is horizontally arranged in a longitudinal extension inside the appliance, where the hinge cabinet is fastened in a hinge bearing by insertion. An adjusting lever (48) is connected with an end of the spring.
