Abstract (en)

[origin: GB2464978A] An introducer 10 includes release wires 42 that constrain at least one stent 4' whilst the remainder of a stent graft 18 is expanded during deployment. By allowing the constrained stent 4 to expand after an adjacent stent 4, the constrained stent 4' overlaps with the interior of the adjacent stent 4 where the stent graft 18 is deployed within a curved body lumen 70.
