Abstract (en)
[origin: EP2363039A1] The rack (1) has a set of superimposed plates (2A-2G) provided with an edge (7) and other edges, where the plates are joined together through one flexible lateral wall (3) and other flexible lateral walls. One of the superimposed plates is flexible. Each edge of the plate is connected to a rigid tube. The edge of the plate is provided with a removable fixation unit that fixes the rigid tube to the edge of the plate. The fixation unit comprises a flexible sheath connected to the edge of the plate and receives the tube. An independent claim is also included for a storing device comprising a cabinet.
