Abstract (en)
It comprises a stable liquid pharmaceutical product in a glass container, said pharmaceutical product comprising bisphosphonate, obtainable by a process comprising: (i) mixing the bisphosphonate with at least one pharmaceutically acceptable excipient in an appropriate solvent to obtain a mixture, (ii) filling the mixture into the glass container, (iii) terminally heat sterilizing the filled glass container, and (iv) cooling the sterilized filled glass container within maximum 5 hours to at least room temperature.
