Abstract (en)

[origin: EP2363355A1] The box (10) has a lower box part (11), and an upper cover (12) that is connected with the box part in a pivotable manner. The cover has narrow, perpendicular cover-side walls (19-22) and a cover wall (18). Intermediate surfaces (38) are formed in an area of one of the side walls, and comprise a course that is different from a plane of the adjacent side walls of the cover. The intermediate surfaces are limited by an attenuation line formed in the material of the side walls, where folded lines between the side walls are interrupted by the intermediate surfaces.
