Abstract (en)

[origin: EP2363529A2] The system (1) has a lower plate (2) and a fastening medium for fastening the lower plate in underground (U). The press pads (45,46) are fastened at an attachment section (47) at the underground. The press pad has a press pad section, which projects the system in a new condition with free end section (55) over side sections (36,37) of an upper plate. An assigned surface of the end section is arranged above the assigned side section of the upper plate at a distance.
