Abstract (en)
[origin: EP2363635A1] The lamp receiver (1) has a ring element (2) for the arrangement of a socket of a lamp, where the ring element has a radial receiving surface. A tubular bulb fitting body is made of an electrically conductive material. The tubular bulb fitting body has multiple contact springs (14) that are arranged in circumferential direction to a side facing a reflector and has other contact springs that are arranged in circumferential direction to another side facing an ignition device (6).
