Abstract (en)

The invention relates to a toilet bowl, comprising: - an upper edge enclosing a cup-like recess; - a rear wall, which rear wall comprises suspending means for suspending the toilet bowl from a wall; - a downward directed outlet opening which is connected to the cup-like recess. The invention further relates to a combination of a toilet bowl according to the invention and a sanitary space with at least a floor and an upright wall, wherein the toilet bowl is arranged with the rear wall on the wall and suspended above the floor.
