Abstract (en)  
The siphon (1) has a flow channel (4) arranged in a housing (5) and provided with a flow channel inlet and a flow channel outlet that are connected with inlet and outlet connections (2, 3), respectively. The flow channel is wound around the inlet connection, and a winding section of the flow channel serves as an odor trap. The winding section runs around a winding point, and comprises a flow channel outer side and a flow channel inner side. Distance of the flow channel inner side to the winding point amounts to 25 percentage of distance between the flow channel outer and inner sides.

Abstract (de)  
Die vorliegende Erfindung betrifft einen Absaugsisphon (1) für eine Unterputz-Abflussinstallation, der mit weniger als 0,8 Litern Spülmenge, insbesondere höchstens 0,5 Litern Spülmenge auskommt und bei dem dennoch ein ausreichender Absaugeffekt bereit gestellt wird. Der erfindungsgemäße Absaugsisphon (1) ist sehr kompakt ausgebildet und damit für alle Urinaltypen in Unterputz-Installationen einsetzbar und zudem kostengünstig herstellbar.
