Abstract (en)

[origin: EP2365166A2] The door hinge has a pivot joint (1) with a hinge strap (2) and a receiving unit for receiving the hinge strap. The receiving unit has a fastening element and a receiving body adjustable relative to the fastening element. The receiving body consists of two clamps connected with each other. Two adjusting spindles are rotatably arranged between the two clamps. The fastening element has a threaded hole, in which an adjusting screw is arranged for vertical adjustment of the receiving body.
