Abstract (en)  
The arrangement has edge profiles (1, 2) fixed between two end walls (3) and supported between two side walls (5, 7). The edge profiles have respective fins (8, 9) pointing into an inner area of the arrangement. A support (16) is arranged between the end walls and connected with the fins in a form-fit manner. A support part is arranged at a distance to the edge profiles, where the support has a locking unit. A spring unit is engaged into the locking unit, where the support part is connected with a housing. Tongue-and-groove joints are formed between the edge profiles and the side walls.
