Abstract (en)

The present invention relates to a gas detector generating an electric signal for only two or three gas pressure states. The gas detector may comprise a membrane (M), a rod (A), a lever (L), contacts (C1,C2) and electrical terminals (T1,T2,TL). The gas detector can be combined with a gas cooking household appliance. The invention relates further to a gas distribution assembly (AS) with such a gas detector.
