Abstract (en)  
[origin: EP2365592A2] The socket has a base housing (1) with a plug connector retainer (3) formed as a single piece with a mounting flange (2), and a plugging contour (5) lying at a plug connector in a plugged condition for connecting the connector with the retainer. The contour and the housing are made of thermoplastic, where the contour is sleeve-shaped. The retainer has two sections (7, 9), where one of the sections is pot-shaped and arranged behind a surface (8) of the flange turned towards the connector in a plugging direction (10) of the connector. The other section is arranged before the flange surface.
