Abstract (en)
[origin: EP2366825A1] An embroidery frame (1) includes an outer frame (2) having an inner circumferential wall surface (20) and an outer groove (22) formed in the inner circumferential wall surface (20), an inner frame (3) including an outer circumferential wall surface (30) and an inner groove (32) formed in the outer circumferential wall surface (30), the outer circumferential wall surface (30) retaining a workpiece cloth (4) together with the inner circumferential wall surface (20) in a condition where the workpiece cloth (4) is arranged between the inner circumferential wall surface (20) and the outer circumferential wall surface (30), and a movable member (5) movable in a radially inward direction of the outer frame (2) from an initial position to the inner groove (32), the movable member (5) being accommodated in the outer groove (22) when in the initial position, the movable member (5) increasing a tensile force of the workpiece cloth (4) by moving radially inward in a manner to temporarily retain the workpiece cloth (4) between the outer frame (2) and the inner frame (3).
