Abstract (en)
[origin: EP2366854A2] The system has a locking cylinder (2), and a locking lip (4) arranged at the locking cylinder, and a locking metal sheet (24) comprising an opening (28). Dimension of the opening in a direction is larger than dimension of the opening in another direction. The cylinder is guided into the opening for locking the system, and the locking lip is snatched below the locking metal sheet. The locking metal sheet is arranged at a locking dome (22), which comprises a dome opening (30). The dome opening is arranged such that the cylinder is guided by the dome opening and the former opening.
