Abstract (en)  
[origin: EP2366864A2] The present invention relates to a screen device comprising a screen roller (1), a screen which can be rolled up onto and unrolled from said screen roller (1) and an interior space in which the screen roller (1) can be fitted in order to accommodate the latter in the installed position of the screen device, the screen device comprising an opening (4) facing the interior space (3), via which the screen roller (1) can be fitted in said interior space (3) in a direction essentially according to the direction of the rolling/unrolling movement of the screen.
