Abstract (en)
[origin: EP2367244A1] The comb (10) has a supporting rail (11) with plug contacts (14), where connection areas comprise reference breaking point notches between the rail and the plug contacts for breakage of the contacts. The rail has a marker plate (12) at a front end. The marker plate comprises a writable or labelable text field (13). A casing of the marker plate forms a single piece plastic mold part together with plastic coating of the rail. The casing is formed as a frame in a bulged manner. A hanging strap provided at the marker plate comprises a borehole that lies in a circular impact unit of a sheet plate.
