Abstract (en)
[origin: WO2010073225A2] The invention relates to a security document (1) that comprises a revelation screen (3) associated with a combined image (2) provided on the document (1) and/or on another object, said combined image (2) comprising at least two interleaved images, at least one of the combined image (2) and the revelation screen (3) being provided in an area of the document (1) that is at least partially transparent, the revelation screen (3), when at least partially placed over the combined image (2) of the same document (1) or the other object, enabling the consecutive observation of the interleaved images by a relative movement of the revelation screen (3) in relation to the combined image (2), wherein the placing of the revelation screen (3) over the combined image (2) can be carried out by folding the document (1) and/or by placing the document (1) over the other object.
