Abstract (en)  
[origin: EP2368667A1] The device has a measuring head movable between a resting position and a measuring position. A powered drive device (80) is attached to a stopper (57) for adjusting the position of the stopper such that the measuring position is adjustable. The drive device is designed as an electromotor powered drive device such as a hydraulic drive device or pneumatic drive device. A control device (96) controls the drive device in an automatic or semi-automatic manner. The control device is connected with a radio frequency identification (RFID)-reading device.
