Abstract (en)

[origin: EP2368835A1] The device (1) comprises a treatment chamber (2), in which the containers (10) are treated, and a transport unit (4), which transports the containers inside the treatment chamber. The treatment chamber is divided by a wall (8) that is arranged in a movable manner. A sealing unit (20) is provided, which has a circumferential channel (22), in which a liquid sealant is inserted. An independent claim is also included for a method for treating containers.
