Abstract (en)

[origin: EP2369062A1] The intelligent element (104) has an electronic component for visually and/or acoustically reproducing and projecting character and/or image displays and/or tone and tone sequence outside the element. The component is accommodated in a cavity of a projection unit (111) within the element, and a transparent cover layer (117) is provided in the cavity, where the element is formed as a water-tight element. The component is formed such that the component enables interactive communication between a computer provided in the element and a user.
