Abstract (en)

[origin: EP2363539A1] The device (1) has a capsule inserted into the device, and a piston pump (11) for conveying substances e.g. shampoo, shower gel and soap, stored in the capsule. The capsule has chambers for storing the respective substances, and a chamber is connected with an outlet of the device. A capsule holder supports the capsule in a rotatable manner, and an opening device opens the capsule. An upper wall and/or a lower wall of the capsule is made from plastic or metal i.e. aluminum. The upper wall or lower wall has a circular-cross section, where the capsule has height smaller than 3 cm or 2 cm. An independent claim is also included for a method for body caring during showering, hand washing and bathing.
