Abstract (en)

[origin: EP2369092A1] The edging element (5) has a central portion (6) whose face defines an apparent face of the edging element. Two side wings (7) are articulated with the central portion, and are folded under the central portion. Double face adhesive bands are arranged at lower faces (71) of the wings in a folded position. Connection portions between the central portion and each wing have thicknesses lower than that of the central portion and the wings, and form V-shaped hinges (65). The central portion, the connections portions and the wings are made of plastic, metal or composite material.
