Abstract (en)

[origin: EP2369105A2] The assembly (1) has a blind frame-profile (2) comprising a groove (4) for accommodating fitting elements (5). A fitting body is arranged on a blind frame at a side that is turned away from the frame profile. A fastening element is arranged at the side of the fitting body. A locking element is formed at the fastening element and provided for locking the fitting elements in the groove by using a locking retainer (11), where the locking element extends over the entire length of the fastening element. The fitting elements are supported at a wall of the groove by using a supporting element.
