Abstract (en)

[origin: EP2369114A1] The compensating element comprises wedge elements (10,11), which are provided with a gradation (15) that is arranged transverse to a wedge surface (12). The wedge surfaces extend obliquely corresponding to a base area along the gradation of the wedge elements. The wedge elements comprise slots (13). The slots of the wedge elements stand at right angles to each other. An independent claim is also included for a method for mounting a compensating element.
