Abstract (en)

[origin: EP2369580A1] The pin (1) has a fastening device fixing free ends (16) of a string (15). The fastening device has a clamping element (8), a circumferential collar (4), a counter bearing surface and a holding section at the pin. The holding section and the clamping element are arranged such that the clamping element is axially moved along the holding section on the pin and locked in a clamping position. The clamping element, the collar and the surface are arranged such that the clamping element, the collar and the surface are clamped and held between longitudinal sections of the ends of the string.
