Abstract (en)

[origin: WO2010076190A2] The invention relates to hair treatment agents, which contain at least one quaternary imidazoline derivative having at least two long fatty groups according to the formula (I) and at least one diester of ethylene glycol having two long fatty groups according to the formula (II) and a cosmetic carrier, wherein the hair treatment agents cause surprisingly good properties of the treated skin and hair, in particular improved combability, improved shininess, and improved elasticity.
