Abstract (en)  
[origin: WO2010080505A2] The present disclosure describes processes for producing cyclohexenes using Lewis acidic ionic liquids comprising the steps of providing to a reactor an  $\alpha,\beta$ -unsaturated carbonyl dienophile, providing to the reactor a 1,3-diene, providing a Lewis acidic ionic liquid to the reactor; and reacting the  $\alpha,\beta$ -unsaturated carbonyl dienophile with 1,3-diene to form a substituted cyclohexene product. The  $\alpha,\beta$ -unsaturated carbonyl dienophile can be mesityl oxide, the 1,3-diene can be piperylene; and the Lewis acidic ionic liquid can be  $\text{AlCl}_3\text{:}[\text{C}_2\text{mim}]\text{Cl}$ ;  $\text{AlCl}_3\text{:}[\text{C}_8\text{mim}]\text{Cl}$ ; or mixtures thereof.
