Abstract (en)

[origin: WO2010074554A2] The disclosed invention relates to a method for use in managing of a plurality of resource devices, supported by a peer-to-peer (P2P) network which enables transferring of files in a non-sharing environment. The main steps include transferring job execution input from a submission host to an execution host, job execution and finally transferring the job output back to the submission host in a file non-sharing manner.
