Abstract (en)
[origin: WO2010063593A1] The invention relates to an alignable housing (1), particularly an alignable electronics housing, which comprises an actuation element, preferably an actuation lever (2), for locking and/or releasing a component that can be placed on the electronics housing, particularly a relay module, and at least one marker, wherein the marker (3) is formed or arranged on the actuation lever.
