Abstract (en)
[origin: WO2010076223A1] The invention relates to a surge arrester comprising a short-circuit device, wherein the short-circuit device comprises at least one first base element. The first base element is rigidly connected in an electrically conducting and mechanical manner to a first electrode of the surge arrester. The short-circuit device comprises at least one spring arm (6) arranged on the base element (5), wherein the free end of the spring arm has a distance to the base element, and the spring arm extends over at least two adjoining electrodes (2, 3) of the surge arrester (1).
