Abstract (en)  
Provided is a dishwasher in which a structure of a sump (20) is improved to prevent a filter from being blocked by foreign substances. The dishwasher includes a sump (20) in which washing water is collected, a filter part disposed within the sump (20) to separate foreign substances from the washing water, a rotation unit (200) rotatably disposed on a side of the filter part (130), and at least one blade (215) disposed on the rotation unit (200) to scratch the foreign substances attached to the filter part (130). According to the dishwasher, the foreign substances adhering to the filter (130) during the filtering of the washing water can be cleaned to prevent the filter from being blocked by the foreign substances.
