Abstract (en)
[origin: EP2371757A1] The industrial truck, particularly hand lift truck, has an auxiliary chassis frame (5) that is provided with a wheel carrier aligned at highway level (8). The auxiliary chassis frame is made of a base part (11) and a connecting unit (12,13), where the base part is held at displaced lifting unit (4). The connecting unit is held at the base part. The base part and the connecting unit have a connecting area in each case. A quick coupler (14,15) is formed with the connecting unit. An independent claim is also included for a mounting part, which has an auxiliary chassis frame and a displaced lifting unit for retaining an industrial truck.
