Abstract (en)
[origin: EP2372067A2] The door- or window locking device (1) has a permanent magnet (3) for holding a door (2) or a window in an open position. An electromagnet (4) releases the door or window for the movement in a closed position during current feed. A battery (5) is electrically connected with the electromagnet by connecting units for current feed. A wirelessly-actuated closer (6) is provided as connecting unit for current feed of the electromagnet.
