Abstract (en)  
[origin: EP2372069A2] The frame (1) has two framework elements (2, 3) including groove-like recess (4, 5), made of wood and form-fittingly connected with a fire protection plate (6) by a spring. The recesses of the elements with same depth, where the elements are stuck together with the plate. The elements form a front side and a rear side of the frame, respectively. The plate is provided with a layer (8) made of foam material during fire. The former element has a stopper (10) for a door- or a window leaf (7), where the stopper is provided with a sealing rim (11).
