Abstract (en)
[origin: EP2372168A1] The arrangement comprises a groove shoulder with a narrowing groove opening at its open side and a sensor (12) over its smaller side is inserted into a groove (14) through the groove opening. The sensor is provided with a locking screw (18), which is put through a housing (30) of the sensor. A locking element (16) is provided, which is designed as a sheet and is surrounding the sensor in the cross section almost completely and from the groove base.
