Abstract (en)  
[origin: WO2010066857A1] The invention relates to a hydroponic culture method for the production of at least one halophytic plant, consisting of the following steps, namely: a first culture step in a non-saline medium, comprising the germination of sown seeds of at least one halophytic plant; and a second culture step in a saline medium, comprising the growth of the germinated plants obtained in the first culture step, with the transition between the first and second cultivation steps being performed as soon as the maximum germination plateau is reached.
