Abstract (en)
[origin: WO2010063952A2] The invention relates to a makeup and/or keratin fiber care method, particularly for the eyelashes and eyebrows, consisting of applying a cosmetic composition to the latter that includes, in a physiologically acceptable medium: A) a siloxane resin containing at least 80 mol % of the following units: (i) (R³SiO^{1/2})_a (hereinafter, "M" units) and (ii) (SiO^{4/2})_b (hereinafter, "Q" units) where R' is, independently, an alkyl grouping having 1 to 8 carbon atoms, an aryl grouping, a carbinol grouping, or an amino grouping with the proviso that at least 95 mol % of the R' groups are alkyl groups; a and b have values strictly greater than 0; and the ratio of a to b is 0.5 to 1.5; B) a film-forming propyl silsesquioxane resin containing at least 80 mol % in (R"SiO^{3/2}) units (hereinafter, "T" units) where R" is, independently, an alkyl grouping having 1 to 8 carbon atoms, an aryl grouping, a carbinol grouping, or an amino grouping with the proviso that at least 40 mol % of the R" groups are propyl groups, the weight ratio between the resins A) and B) being 1/99 to 99/1, the resins A) and B) not being bonded to each other by covalent bonds, and the number of M units in the final mixture being strictly less than the number of (T+Q) units; C) at least one wax; and D) at least one hydrocarbon volatile oil. The invention also relates to a cosmetic kit using such a composition.
