Abstract (en)

[origin: WO2010070689A1] A reactor (1) is described for the thermo-catalytic conversion of plastic materials into liquid hydrocarbons (37) through de-polymerisation, comprising at least one reaction furnace (3) equipped with at least one reaction chamber (5, in which at least the surfaces of the reactor (1) itself in contact with the plastic materials reacting inside the reaction furnace (3) are covered with at least one layer (39, 41, 45, 47) of slow-release catalyst material.
