Abstract (en)
[origin: WO2010063556A1] The invention relates to a hydraulic directional valve (1) comprising a valve housing (6) and a filter element (13), wherein at least one groove (9) encircling the circumferential direction is provided on the valve housing (6), wherein the filter element (13) is arranged in the groove (9) and comprises at least one frame element (14) and a filter fabric (15) firmly connected thereto, and wherein the groove (9) comprises a groove base (10) and two side walls (4) which extend substantially in the radial direction and circumferential direction.
