Abstract (en)

[origin: WO2010079205A1] The invention relates to a light (1), in particular a recessed light for ceilings and/or walls, comprising a light housing (2), which is provided for installing on or in a wall or ceiling and for holding lighting means, and an inner frame (10), in particular for mounting optical elements, which is at least partially detachable from the housing (2) and is connected to the housing (2) in an installation position through a locking arrangement. The locking arrangement comprises a detent mechanism (30), through which the inner frame (10) is locked with the housing (2) in the installation position and the locking of which can be released without tools, wherein the detent mechanism (30) comprises a solid detent hook (35), which interacts with a mating element (40) and is movably arranged in such a way that the detent hook can be moved between a detent position and a release position.
